The network is down?!?

brought to you by: Docwho & Council of the Internet Wizards

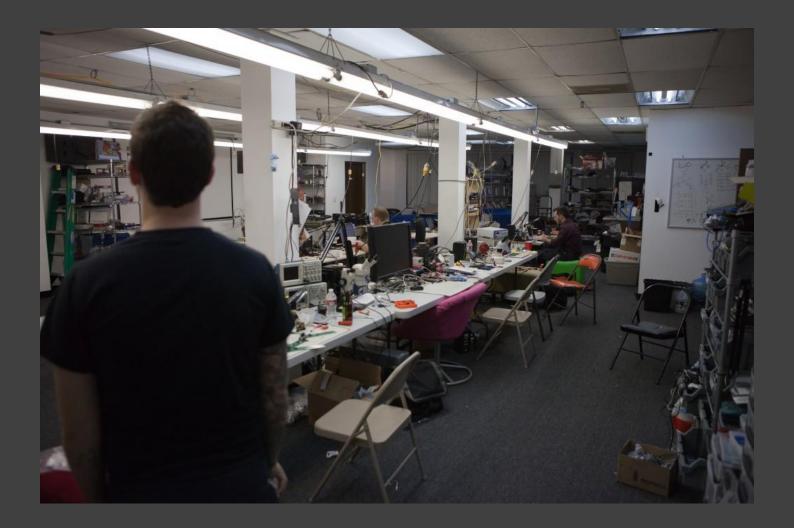

Who am I?

- I'm Batman!
- Ok, not really...
- Keyholder at Nullspace Labs
- Been working on networks since 1995
- Owner of awesome fezzes
- Recently started learning circuit design

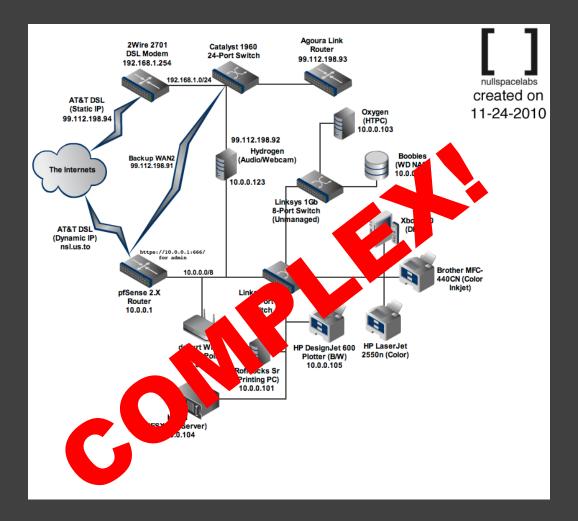

Nullspace Labs: May 2010

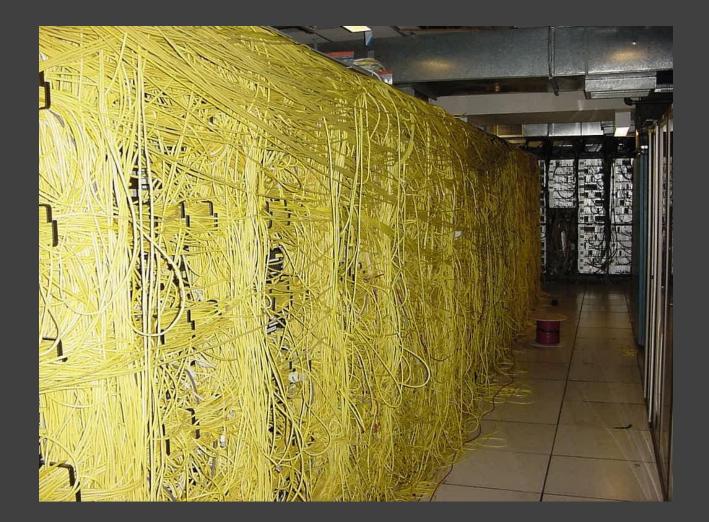

Nullspace Labs: 1 year old now!

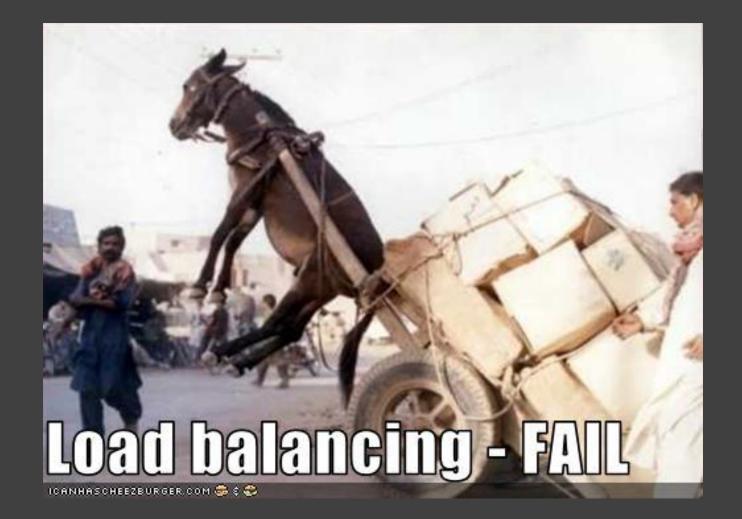

So what's the problem, dude?

Can't you just trace it?

What else is there?

Result:

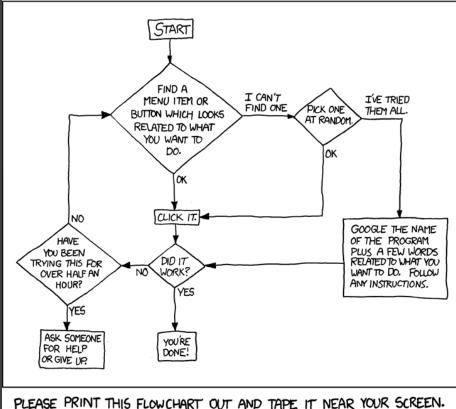

Result (Cont'd):

Our Goal: Teach thyself

DEAR VARIOUS PARENTS, GRANDPARENTS, CO-WORKERS, AND OTHER "NOT COMPUTER PEOPLE."

WE DON'T MAGICALLY KNOW HOW TO DO EVERYTHING IN EVERY PROGRAM. WHEN WE HELP YOU, WE'RE USUALLY JUST DOING THIS:

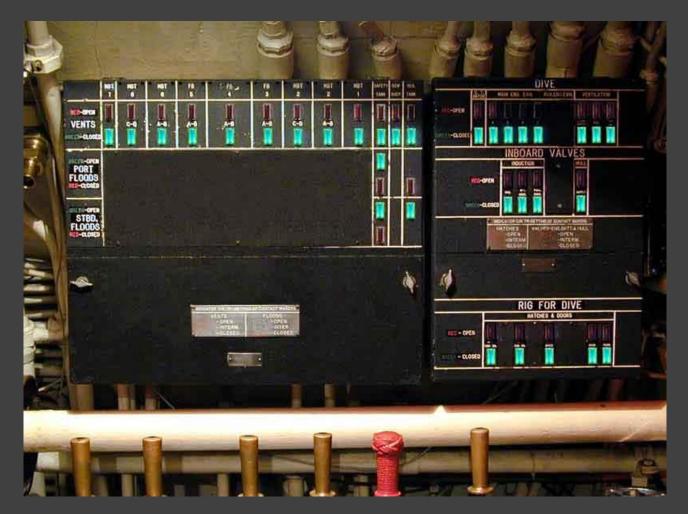

CONGRATULATIONS; YOU'RE NOW THE LOCAL COMPUTER EXPERT!

How do we do this?

- Learn from submarine design
- Make it fucking cool looking
- Give users ability to see important info at a glance
- Help users quickly isolate trouble area(s)

Submarine design: WTF you talkin about Willis?

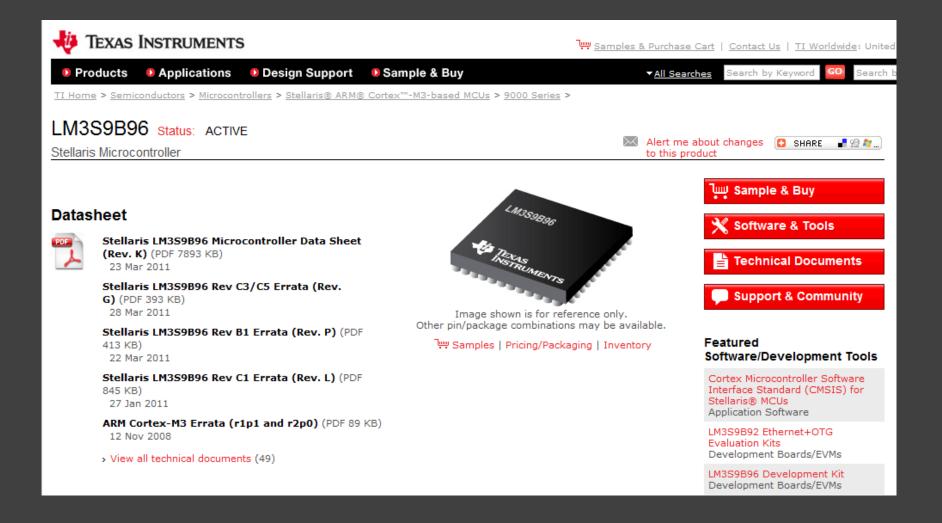

MOAR Greenboards

Early Design notes

- Device will be attached to both wired and wireless networks to test both domains.
- DNS resolution Time Since Outage/Uptime in Days/Hrs/Min/Uptime as a percentage
- Pfsense LAN ping Time Since Outage/Uptime in Days/Hrs/Min/Uptime as a percentage
- Wifi Network(s) ping Time Since Outage/Uptime in Days/Hrs/Min/Uptime as a percentage
- Internet ping Time Since Outage/Uptime in Days/Hrs/Min/Uptime as a percentage
- Bandwidth instantaneous usage in kbits/sec

Parts is parts, right?

Challenges

- This shit is hard
- Only recently started designing electronic circuits
- Have to learn to code for Stellaris
- Wifi integration
- Determining right amount of drinking to do to enhance project coding
